

CLEANIK CONCENTRATED CLEANER

Description

Concentrated degreaser, specially designed for cleaning continuous surfaces such as microcements, epoxies and polyurethanes, ideal for removing all types of grease from any washable surface. This product is based on a combination of surfactants, inorganic salts, bioalcohols and sequestrants that allow a wide range of applications as a highly effective degreasing cleaner.

Thanks to the incorporated sequestrants, it prevents the formation of rings due to water hardness, guaranteeing the same effectiveness in both soft and extremely hard water. It does not contain dangerous ingredients, such as soda or acids, it rinses easily and has a soft citrus scent, without emitting dangerous or annoying vapours. In addition, it does not damage plastics.

Fields of Application

General degreaser for all types of washable surfaces: microcements, industrial floors, metals, plastics, lacquered surfaces, wood, tiles, glass, mirrors, fabrics, canvas, etc.

It is suitable for the food industry.

Instructions for use

Depending on the dirt to be cleaned, use pure or diluted up to 1/10 in water. Spray directly, leave to act for 15-20 minutes and rinse with water.

Technical Data

Density (Kg/lit)	1.040 +/-0.010
pH	11.50 +/-0.50
